

# Pro-Filing Suite: Call Report Pro

User-centric solutions from  
a leader in regulatory filing  
software

## Now it's Easy to Generate the Reports Your Management, Your Board, and Your Regulators Want.

The Jack Henry Pro-Filing Suite Call Report Pro makes it really easy to do your Call Report right. All the screens look like an actual Call Report, so it's familiar and you always know where you are. Built-in edits automatically check your entries and alert you to possible errors. And on-screen Help is there by clicking the convenient hyperlinks.

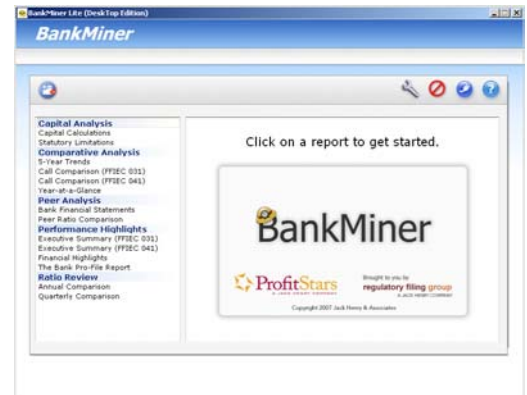

Call Report Pro also features the **DataLink** tool that will import data directly from your general ledger and other data files (i.e., detail for loans and deposits) into your Call Report to reduce filing preparation time and risk of errors.

Additionally, Call Report Pro even includes an **RC-R Worksheet** tool that automatically extracts the relevant data from your Call Report information, prepares your worksheet, and lets you transfer the completed worksheet information back into your Call Report. Plus, we provide a built-in secure Web services connection to the Central Data Repository (CDR) for your transmission needs. It makes sense that thousands of bankers have relied on our software for over 20 years!

## Compare Your Current Numbers to Past Call Reports and to Your Peers!

Once you've entered your Call Report data, the **BankMiner** Reports system offers you more than 10 presentation-quality reports that let you instantly compare your current Call Report to previous ones. It's a fast and easy way to chart your progress and spot potential problems.

Plus, you can use the Peer Analysis reports to see how your bank is doing compared to any 4 peer banks that you select. For your convenience, the reports can be exported in PDF, Excel and HTML formats.

quote and demo!

## Why Switch?

Whether your bank is big or small, senior management and your Board have a growing need for information on your bank and its peers. This is the only system that helps you do your Call Report and then combines your data with other banks' data to give you the reports executive management is asking for. So you get what you have to have and what you want to have with less time, effort, and cost.

Plus, the DataLink, RC-R Worksheet and BankMiner tools are *included* in the annual subscription price. So you don't have to pay more to get more!
